Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 November 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5 is/are pending in the application.

DETAILED ACTION

Claim Objections

1. Claims 1-3 and 5 are objected to because of the following informalities: In claim 1, line 4, “)” should be taken out. In claim 4, line 1, “read a BCA” should be --read a BCA data--. In claim 5, line 2, “claim 1” should be --claim 4--. Appropriate correction is required.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language “BCA”(claims 1 and 4) is vague and indefinite, since acronyms do not necessarily have universal meaning, esp. overtime. The phrase – burst cutting area--- should be used in the first instance in each claim.

Allowable Subject Matter

4. Claims 1- 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The following is an examiner's statement of reasons for allowance:

In claim 1, the limitation of a method for controlling a burst cutting area (BCA) clock to read a BCA data on an optical medium comprising: when a defect occurs, then modulating the BCA clock for reading the BCA data in the defect; checking the BCA data; and if the BCA data is matched, outputting the BCA data; else re-modulating the BCA clock, is not anticipated by, nor made obvious, over the prior art of record.

In claim 4, the limitation of a clock control circuit for controlling a burst cutting area comprising: a counting unit for receiving a BCA data and a BCA reference clock and outputting a counting signal based on the BCA reference clock, the counting signal being cleared according to the data of the BCA; a comparator for receiving the counting signal from the counting unit for being compared with a default value, if equal, then a corresponding signal being outputted; a switching unit for receiving an output from the comparator, the BCA data, a defect signal and a BCA reference clock for switching an outputted control signal; and an output unit for receiving an output of the comparator and the control signal from the switching unit for outputting a BCA clock signal, is not anticipated by, nor made obvious, over the prior art of record .
